PROJECT

Frankenschnellweg expansion

- As part of the junctionless expansion of the Frankenschnell-weg in the Sandreuth district and the associated relocation of pipes and cables, pipes are to be laid in the cut-and-cover method
- The relocation affects electricity, water, telecommunications and district heating lines as well as the foundation of collecting and distributor shafts

OUR SERVICES

- Subsoil analyses with geotechnical report with foundation recommendations for the pipelines and shaft structures, indicating suitable construction methods having regard for the groundwater situation
- Soil analysis with report required under waste legislation to determine the reusability of excavated soil and asphalt
- Clarification of the groundwater situation based on the inves-tigation results having regard for the existing groundwater monitoring system
