

DR. SPANG

INGENIEURGESELLSCHAFT FÜR BAUWESEN, GEOLOGIE UND UMWELTTECHNIK MBH

## DEVELOPER

Town of Überlingen am Bodensee, Urban Development & Greenery

## PROJECT

Stability of rock-cut cellars in Überlingen

- Hollows have been dug in the rock walls in the municipal gardens and in the adjacent Grundgraben in Überlingen for a variety of purposes since the Middle Ages.
- The gardens contain what is known as the Kneipp cellar.
- Size approx. 8 m x 3 m, up to approx. 3 m high
- The Grundgraben contains the rock-cut cellar used by the town gardeners as a store, approx. 50 m long, up to approx. 8 m high and with a span of approx. 6 m

## OUR SERVICES

- Geotechnical analyses of stability
- Consulting services
- Study of various stabilization options
