PROJECT

Antwerp container facility

- Instating an automated container system facility
- A number of crane tracks running in parallel, set up on local concrete pillar supports around 15 m in height with a cross-section of 1.7 x 0,7 m.
- The foundations for the pillars were sunk individually using a square area of 3.6 x 3.6 m and a height of 1.4 m
- Beneath the individual foundations, in each case 4 localised driven piles were planned with a diameter of 0.61 m and an angle of 1: 8

OUR SERVICES

- Expert evaluation
- Geotechnics advice
