Amberg municipal civil engineering department

PROJEKT

Cleanup of contaminated former Baumann site

- Clean-up of a contaminated site involving replacement of contaminated soil up to 11 m below the surface of the site
- Because of ongoing civil engineering works, evidence is gathered for the medical centre northeast of the site
- Vibrations caused by heavy construction machinery (rollers, diggers) can cause damage to buildings.

OUR SERVICES

- Performance of vibration measurements for buildings adjacent to the site
- Continuous measurement for a period of 4 weeks pursuant to the requirements of DIN 4150-3
- Evaluation and interpretation of the measuring data
