DEVELOPER
Stricker-Weiken GmbH & Co. KG, Warstein

PROJECT
Expansion of spoil dump in "Schledde" quarry, Hemer
- Stabilization of the spoil dump in the "Schledde" quarry
- Dump expanded by approx. 2 ha to a total surface area of 4 ha
- Measures to establish a stable dump

OUR SERVICES
- Subsoil analyses
- Stability investigations pursuant to DIN 4084
- Planning and development of measures to improve the stability of the dump
- Concept design and surveying of a settling and retention basin as a receiving and settling basin for eroded soil material
- Laboratory tests to determine the installation criteria
- Measures to prevent soil subsidence close to the surface and slaty erosion
