DEVELOPER
Luitpoldhütte AG, Amberg

PROJECT
Slope stabilization Luitpoldhütte landfill site in Amberg

- The landfill site has on its eastern side a steep slope of about 15 m in height covering a distance of approx. 220 m until immediately adjacent to a side road
- Collapse of the slope on the eastern flank
- Approx. 40 x 60 m of the slope surface set in motion and spilled onto the adjacent road

OUR SERVICES
- Geotechnical field and laboratory tests and examinations
- Stability investigations pursuant to DIN 4084
- Planning of the renovation of the slipping mass having due consideration for landfill regulations
- Geotechnical report with recommendations for action
