**DEVELOPER**
Deutsche Bahn AG through Franz Kassecker GmbH, Waldsassen

**PROJECT**
Replacement of supporting structures, Crailsheim, section 4951

- The existing supporting wall is badly damaged and needs to be replaced
- The supporting wall must be replaced by shotcrete stabilisation with prestressed piles and in-situ concrete wall
- In some places permanent slope stabilization with steel mesh and ground anchors must also be established above the supporting structure

**OUR SERVICES**
- Execution planning
- Technical processing
- Stabilization records
- Execution drawings according to HOAI 2009 § 42, service phase 5, and § 49, service phases 4 and 5
