PROJECT

Construction of new bridge over the Bimbach in Erlangen

- Construction of a new single-span bridge over the Bimbach in Erlangen - Häusling (structure 5.29) following complete demolition of the existing structure with full closure of Kieselbergstr.
- Construction of new Bimbach pipework at Kernbergstraße in Erlangen - Büchenbach (structure 5.26)
- Demolition of the existing structure and construction of a new road crossing 10 m further north

OUR SERVICES

- Subsoil analyses including analyses of the existing concrete
- Evaluation of the results
- Foundation recommendations, study of options
- Settlement calculations
- Spot sampling of the existing structures in order to determine the RC quality of the concrete
