PROJEKT

"MEGAL loop pipe Schwandorf - Windberg

- MEGAL loop pipe in the section between Schwandorf (Bavaria, districts of Schwandorf, Cham, Straubing) and Windberg
- Special construction methods (culverts, HDD where appropriate, microtunnels) required for crossing the Naab and Regen rivers

UNSERE LEISTUNGEN

- Route investigation for the new pipe
- Soil and subsoil reports
- Determination of quantities for the civil engineering specifications with measurements of the drainage flows, slope stabilization etc.
- Special expert reports for road and rail crossings and for new station structures (pigging and valve stations and gas pressure measuring and control installations) and for the special Naab and Regen crossings
- Gathering water engineering evidence (drainage planning)
