INGENIEURGESELLSCHAFT FÜR BAUWESEN, GEOLOGIE UND UMWELTTECHNIK MBH

DEVELOPER

State office for construction, Würzburg

PROJECT

B27 Würzburg - Karlstadt road, rock stabilization measures south of Karlstadt

- Along the B27 south of Karlstadt rock stabilization measures over a total length of approx. 2,000 m are required on the slopes of the Maintal valley in order to protect the roadway
- 5,000 m² of rock clearance
- 500 m² of overnetting, 450 m of rock protection fencing, 350 rock nails to protect against individual risks
- 200 m³ of shotcrete underpinning

OUR SERVICES

- Geotechnical site survey
- Surveying services
- Rockfall simulations
- Development of stabilization and remediation proposals in a study of options inc. cost estimate
- Rock stabilization planning services
- Performance of project and structural engineering planning pursuant to HOAI § 42 and HOAI § 49 for service phases 3 and 5-7
- Expert geotechnical and geological site management
