

DR. SPANG

INGENIEURGESELLSCHAFT FÜR BAUWESEN, GEOLOGIE UND UMWELTECHNIK MBH

DEVELOPER

Regensburg State Office for Construction, roads section

PROJECT

Rockfall protection at Hartlmühle

- Upgrading of road 2394 Laaber-Deuerling, in the vicinity of Hartlmühle
- Construction of a gabion wall to protect against falling rock material
- Steep rock-pierced slope above road 2394 over a length of 400 m, height of rock cliffs up to 35 m above road level
- Extensive risks of stone, rock and boulder falls

OUR SERVICES

- Mountaineering inspection
- Geotechnical site survey
- Assessment of the stability of slopes and inclines
- Risk assessment
- Elaboration of stabilization and renovation proposals
- Rockfall simulations
