PROJECT

Rock stabilization, Flöteberg

- Rocks and boulders keep falling beside rural road L 500, section 140, Othfresen - Liebenburg, station 0.625 - 0.955
- 255 tons of rock have already been cleared so far
- There is a retaining fence in front of some parts of the slope.

OUR SERVICES

- Geotechnical examination of the area on the mountain side of the L 601
- Geological survey
- Geodetic survey
- Analysis and documentation of results
- Recommendation of measures, including concept for the long-term stabilization of the rock slope with options and cost estimates
- Project planning pursuant to HOAI § 43, service phases 3 (final design) and 6 (preparation of contract placement)
