PROJECT

New Bahnstadt Opladen, Leverkusen-Opladen

- The City of Leverkusen is planning to develop the area around Opladen railway station
- Now waste ground, the railway land is to be developed and the former railway buildings on it are to be pulled down
- Bundling the track sections for IC trains and freight trains together will free up the area currently used for freight trains for high-quality urban use and for construction of the Bahnallee road
- As part of the overall “Bahnstadt Opladen” project, the relocation of freight train track 2324 will reduce the area between track 2730 for passenger traffic and track 2324 for freight trains

OUR SERVICES

- Subsoil analysis for the final design
- Expert monitoring and foundation works consulting
- Subsoil report for planning approval application
- Subsoil analysis and report on bridge structures, signal sites and overhead line supports
- Demolition and disposal concept for existing buildings
- Declaration of all substances produced
- Recommendation for demolition and dismantling and preparation of utilization concepts
