PROJECT

Grünthal a.d. Natzschung, remediation of dyke base follow-
ing flood damage

- The damaged dyke is a flood defence dyke that is intended to protect the village of Grünthal from flooding of the adjacent Natzschung river (marking the border with the Czech Republic)
- The flood in June 2013 caused damage to the base of the dyke over a length of approx. 20 m

OUR SERVICE

- Project planning for service phases 1 to 4 for the remediation of the damage to the base of the dyke
- Subsoil analysis
