PROJECT

External monitoring of earthworks for restoration of the Xanten-Kleve dyke

- The Xanten-Kleve dyke association is restoring the left bank of the main dyke between Rhine km 823.0 and km 823.75
- The existing soil of the old dyke will be reused in the restoration of the new main dyke
- The earthworks were carried out between April and September 2015

OUR SERVICES

- External monitoring for the earthworks
- All-day monitoring by a building materials inspector
- Performance of all tests on the construction site
- Operation of an on-site soil mechanical laboratory
- Sampling and suitability and control checks
- Preparation of quality assurance plans
- Participation in site meetings and providing advice for the developer
- Assessment and documentation of the quality assurance of the self-monitoring by the contractor
